The Office of Planning, Design & Construction is pleased to share weekly project updates with the campus, the community, and beyond. While not a comprehensive list, the updates below reflect our more substantial campus projects. If you would like additional details, or information regarding a project not listed below, please contact our office. Thank you for your interest in projects at Missouri State University.

Update for Week Ending December 6, 2019

Ozarks Educational Center, Bull Shoals Field Station
Adam Shuler, Project Manager
Mechanical ductwork, plumbing, and electrical rough-in will be complete and inspected next week. Exterior sheathing on the main building is installed on the wall and a waterproof membrane is being applied before cedar siding can be installed. The roof on the main building has been installed, and the slab for the breezeway will be poured next week. Curbs are currently being poured for the driveway and parking lot. The cabin framing is being installed and exterior sheathing will go on soon.

Cooperative Engineering Expansion and the eFactory Business Incubator Expansion,
Robert W. Plaster Center for Free Enterprise
Adam Shuler, Project Manager
Demolition work has begun on the north end of the building and continues on the south end. Stairs to the roof have been removed and will be relocated. The foundations for the new grand stair case have been laid out and work will begin soon to get those in place. Work on roof drains is ongoing and ductwork is being roughed-in.

Phase II Renovation, Woods House
Shanon Mitchell, Project Manager
The contractor is addressing the remaining construction punch list items and warranty issues that arose after construction. A few items are awaiting material delivery. These items are scheduled to be complete by January 1. An additional construction scope was added to the project that consists of new tile aprons in front of the accessible showers that will allow better sloping for water drainage. This should correct the water pooling issues in those bathrooms. This will impact 16 shower locations, two on each student floor. This work is scheduled to occur during winter break, pending no lead time issues with materials. Final change orders are in review and the contractor is working on closeout documents for the project.

Multi-Purpose Addition, Greenwood Laboratory School
Jerry Compton, Project Manager
Construction of the masonry walls continues. Steel erection has begun. Roof deck and joists are scheduled for delivery during the week of December 16. The Transitway will be closed until March in order to conduct construction activities.
Classroom Addition, McQueary Family Health Sciences Hall  
Michael Mardis, Project Manager
Grade beam work and chilled water line work along Holland is now completed. Chilled water line work in Lot 35 has commenced. Under slab mechanical, electrical, and plumbing has commenced. The shop drawing and submittal process continues. Aluminum curtain wall frame is being installed on the material mockup.

New Residence Hall  
Bruce Colony, Project Manager
Layout crews have arrived to prepare for framing, along with lumber deliveries. Framers are scheduled to begin next week. The final concrete pour on the roof/podium slab is also scheduled for next week. Work on the stem-wall surrounding the dining center is underway, and the storefront installation is to follow immediately. The dining center infill contractor is scheduled to begin the project on December 15. The completion of the parking garage portion of the project is set for July 1, 2020 and the completion of the residence hall portion by early September 2020. The dining center is scheduled for completion by July 2020.

ESports Complex, Springfield Campus  
Mark Wheeler, Project Manager
The mechanical and electrical consultant engineers have completed a 3D laser scan of the space to confirm the existing conditions. Design development work continues and a project schedule is being established. Preliminary furniture and equipment discussions will begin soon.
